nVision Global®

nVision Global's IMPACT TMS is a revolutionary new application that can be configured to fulfill your company's needs and requirements. The application is developed in a modular format to allow you to add and remove functionality with minimum interruption to your everyday business processing.

The Challenge

Our customer was unable to prevent associates in their global location from moving shipments via expedited freight. Most times these shipments should have been placed on rail or ocean modes of transport, but they were placed on air. These costs were only visible once freight bills were audited and nVision Global captured the invoice data, and presented to them the results.

The Solutions

The shipper partnered with nVision Global and began utilizing their Global IMPACT TMS platform. This solution required users to utilize only contracted providers. In addition, the IMPACT TMS provided the shipper the capability for multimodal rating of any shipment and presents both negotiated and spot quote rates in the same view. This ensured the shipper's associates selected only approved transportation providers and the optimal mode of transport.

The Results

As a result of utilizing nVision Global's IMPACT TMS, our customer has saved over €30,000,000 to date by avoiding expedited freight costs. By using the IMPACT TMS solution, they have improved transportation planning and optimization capabilities. They have also seen increased accuracy upon execution, improved workflow management and exception handling. In addition, there has been further savings due to tactical and strategic carrier sourcing and load consolidation

Our customer also utilizes other nVision Global services including Freight Audit & Payment, Business Intelligence and Claims Management to further their cost savings, gain access to vital data and ultimately they have achieved visibility to their entire global supply chain.

About nVision Global

nVision Global offers a full suite of Logistics Management applications that allows our customers complete visibility to their supply chain. By partnering with transportation providers, customers and their vendors around the world, we have developed solutions that allow seamless integration and visibility for everyone involved. Additionally, our Business Intelligence tools have become an invaluable asset for our customers because they allow for the analysis of data to help streamline their Logistics Management processes, optimize their Supply Chain and ultimately reduce their overall cost burden per shipment. nVision Global is always listening to the market, our customers and transportation providers to develop solutions that ensure we remain the ideal choice for customers wanting to grow their business but doing so in the smartest and most efficient way possible.
